The Wildlife Biology and Management Minor is designed to provide students in forestry, natural resource environmental science, biology, animal science and related majors with a broad foundation in wildlife ecology and the practice of wildlife management and conservation. Students are required to complete a core set of foundational wildlife courses that provides a fundamental understanding of basic concepts, principles, and practices of wildlife studies applicable to multiple career lines that incorporate wildlife management, research, teaching, outreach, and land stewardship. Completion of the minor will also satisfy many of the courses required to become a Certified Wildlife Biologist as recognized by The Wildlife Society professional organization.

TOTAL HOURS REQUIRED: Min. 21 hours
